Maz Kanata's Castle in Episode VII Connects to "The Mandalorian" & Episode I In Star Wars: Episode VII—The Force Awakens, Maz Kanata's (Lupita Nyong'o) castle on the planet Takodana holds a lot of fun connections to the larger Star Wars universe — some more obvious than others. Photo Courtesy: Lucasfilm/Disney+ Although C-3PO is fluent in over 6 million forms of communication, he tells Han that the Falcon has a strange dialect — even by his standards. It's no secret that The Mandalorian is packed with great cameos. Adi Gallia (bottom left; voiced by Angelique Perrin) appears on the Jedi Council in the prequels and in several Clone Wars stories. In a twist of fate, Princess Leia's ship, the Tantive IV, is docked on the Rebel flagship, undergoing repairs. When McCain showed Gary the trailer for The Last Jedi, the dog wasn't so interested in his cameo, but his ears did perk up when he heard Fisher's voice. For example, Princess Leia (Carrie Fisher) is taken prisoner by Darth Vader and thrown in cell 2187. Apart from showing astromech Chopper rolling through the base and a pager calling for General (Hera) Syndulla, Rebels' most iconic ship can also be spotted above Scarif in the film's final battle. In both Clone Wars and Rebels, Bo-Katan is voiced to perfection by Katie Sackhoff. In Solo, Lando Calrissian, Han's longtime buddy, pilots the Falcon alongside his trusty droid L3-37 — an outspoken, feminist droid who later updates their consciousness into the Falcon. As seen here, one trooper barely keeps his armor together thanks to some Imperial duct tape. But the Force is still with Gary. However, Darth Vader himself boards said ship to retrieve the schematics. It's fitting, then, that Temuera Morrison, the actor who played Jango in Attack of the Clones, has been cast as Boba in both The Mandalorian and The Book of Boba Fett (2021). During the run of The Clone Wars TV series, Jett inspired the character of Ion Papanoida — namely because his father and sister inspired the character's father and sister — and went on to intern for the video game Star Wars: The Force Unleashed. In A New Hope, Luke Skywalker and Han Solo — disguised as stormtroopers to save Leia — say they're transferring their "prisoner" Chewbacca to cell 1138. Most excitingly, Ahsoka Tano (bottom right; Ashley Eckstein), a fan-favorite character from Clone Wars and Rebels, and Kanan Jarrus (top middle; Freddie Prinze Jr.), a Rebels alum and one of the few Jedi who survived Order 66, can be heard, Boba Fett. Photo Courtesy: Lucasfilm/Disney+ Sure, a tip of the hat to Steven Spielberg's E.T., feels almost expected, but George Lucas had another famous director in mind when populating Watto's junkyard with spare parts, broken droids and half-busted machines. You can spot him later on in Bespin's glorified dumpster. Photo Courtesy: Disney+ Meanwhile, Jodie Comer, who won an Emmy for her portrayal of Killing Eve's assassin-for-hire Villanelle, takes a turn as a young Rey's fleeing mother (top left). Photo Courtesy: Lucasfilm/Disney+ Nonetheless, the devil is truly in the details. Jeremy Bulloch, half-brother of producer Robert Watts, is best known for playing the helmeted Boba Fett in Episodes V and VI. Photo Courtesy: Lucasfilm/Disney+ In A New Hope, a group of stormtroopers runs after our heroes and, on the right-hand side, sharp-eyed viewers will notice that one of the troopers bangs his head on the doorway. If you look a bit to the right, you can also see part of a Playboy pinup. Series Composer John Williams Finally Grabs a Cameo in "The Rise of Skywalker" At 87 years old, legendary composer John Williams has over 260 musical credits, 51 (probably soon to be 52) Academy Award nominations and, of those nominations, five Oscar wins. Photo Courtesy: Lucasfilm/Disney+ Having recently realized her strong connection to the Force, Rey attempts to use a Jedi mind trick on the unsuspecting trooper. And while these troopers aren't particularly cunning — or capable — they're at least...resourceful? Photo Courtesy: Lucasfilm/Netflix; Lucasfilm/Disney+ Look closely and you'll discern R2-D2 and C-3PO. Between all of these films, we also have two high-profile, award-winning animated series, Clone Wars and Rebels; the live-action TV phenomenon The Mandalorian; and countless other shows, books, and games. (The person next to her? Photo Courtesy: Lucasfilm/Disney+ In The Phantom Menace, the battle droid that deactivates in front of Jar Jar Binks has "1138" imprinted on its back. Antilles and Skywalker end up being the only surviving members of the Red Squadron. Even if this gag was purely done by and for the modeling team, it's still fun to know that these folks were enjoying practical effects — and some practical jokes. Later on, Han gets the chance cubs back from her — and, clearly, holds onto them. No, it's not the fact that Harrison Ford (a.k.a. Han Solo) plays Indiana Jones — it's a much deeper cut. In the film's opening, Darth Vader and co. 007 Joins the First Order This next Easter egg isn't really one you can see — and not because it takes sharp eyes to spot it.
